BEST PRACTICE- I

1. Title of the practice: Mentorship programme.

2. Objectives of the Practice:

- To minimize dropouts
- To improve performance
- To reduce stress of the students through personal counselling.
- To Increase the participation of all students in the different activities conducted by the Institute.

The Mentoring system assigns a faculty member to every student. The faculty member is called the mentor for the student. The mentor plays the role of a personal mentor for the student in all matters. For the institute, the mentor is the first point of reference for all matters concerning any specific student. The mentor guides the student at every step of their stay at the institute to be successful at whatever the student takes up. The mentor personally ensures that the student is aware of all the resources available to the student during their course of study at the institute. The mentor is available to counsel the student in any matter of concern apart from the curriculum also.

3. The Context

Students undergo various problems of stress- personal, academic, physical, mental. Students are new to professional college life. It creates a lot of stress, especially to hostel students who are away from family for the first time. Students from educationally weak background feel complex and hesitations in class and unable to perform well due to inhibitions. The Mentoring system is relatively new in general to a student entering the institute. The students do take some time to familiarize and feel more comfortable with their mentors and most importantly develop confidence in them. The students meet their mentors to consult with them regarding the courses to take and to guide them through the registration process. The students might also choose to meet their mentors more regularly for advice regarding matters which may be extra- or co-curricular or otherwise. In addition, the mentor

might also choose to see any student with more regularity when their academic performance concerns the mentor.

4. The Practice:

- Each teacher is assigned around 60-65 students for the complete duration of their study.
- They meet at least once a month to discuss, clarify and share various problems which may be personal or academic, etc.
- The mentors encourage the students to participate in co-curricular and extracurricular activities and sports.
- The mentors also counsel the students in need of emotional problems.
- Mentors take special care of weak students, who are given advice on how to study, prepare a time table for study and clarify the doubts and also given notes to study
- Student problems are discussed in the staff meeting with other faculties and necessary action taken to solve it.

A mentor is the first point of reference for the activities of a student during the complete course of study at the institute. As soon as a student enters the institute, a faculty member is assigned to take over the role of a mentor for the student. The mentor not only guides the student in academic matters but also any matter of concern for the student. The student seeks the advice of the mentor at every step of their course of study beginning from the registration for courses at the start of every semester. The students meet their mentors regularly. However, depending on the need, mentor conducts more meetings with their students. The mentor educates the student about the various course requirements, such as the mandated minimum and maximum course load every semester, and how to choose electives.

The mentor helps the student channel their interests and energies effectively during the complete course of study at the institute. The students meet their mentors for various reasons, like - extra help with the material in a course and are shy to approach a new instructor assigned to the course. Few might be facing problems adjusting to the new environment may be in the hostel or at other places around the institute; some others would like to know about their options of availing various resources at the institute. Students would like to know about their options for going through internships during the break or even the benefits of the same, few might want to do some clinical course work or participate in various competitions in addition to their courses, some other might want to know their options after graduation and how to figure out where they would fit in better. At times the students might just need someone who can give them personal time and attention by listening to their

struggles in transitioning to a higher education environment and finally in becoming a constructive member of society.

5. Evidence of success:

The most important evidence of success for the mentorship program is the behaviour of the students on the campus in general has witnessed a tremendous improvement and the students are much happier and contended with their course of study at the institute after the implementation of the mentorship program. The pass percentage and the average academic performance of the students have also achieved greater heights with the mentoring system. Some students have presented themselves as quite a challenge for their mentors, but they figure out their priorities and start performing better after counseling sessions with their mentors. The students have been at most risk during their initial Stages in the course of study. The mentoring system has addressed the needs of the students and effectively nurtured many students during the duration of its implementation. Apart from these, there is an improved attendance, less drop outs, increased participation in co-curricular and extra-curricular activities, better discipline on campus and respectful relationship between teachers and students. The students are more relaxed and have a healthy relationship with the staffs.

6. Problems Encountered and Resources Required

There were initial problems in creating mentorship programme. One challenge was identifying mentor mentee compatibility. Another major problem revolved around creating a system for interacting student with mentor in the institution. There were also instances where faculty failed to understand the level of student understanding in the class room where mode of teaching is not satisfactory for student to understand. Resources required which supports for mentoring like mutual contact, group discussions, meeting with parents, software tools, audio, video lecture systems are Incorporated.

- To boost the existing skills of the students.
- To boost the soft skills of the students such as effective communication, fluency in the language, presentation skills, eradication of stage fear which will make the student fit for the professional life
- To boost up the instant challenge-facing ability of the students.
- To develop and nurture leadership qualities and abilities among the students.

3) The Context:

Majority of our students come from less privileged section of the society. Various platforms are offered to manifest the hidden potential and mould them into confident individuals. The students need financial, psychological and emotional support which is provided in the institution for a holistic development of the student. Law course is a clinical legal education as its integral part that transforms law students into social engineer. The curriculum prescribed by the University will not be sufficient for the student's future professional tasks , for these reasons, the institution planned and adopted certain activities apart from regular curricular activities so as to drive them to take part actively in all the activities conducted in the institution.

4) Practice:

- All the faculties along with the student law forum members schedule the fest dates, theme, name of the fest, several competitions to be conducted.
- This fest is conducted as a week long programme without disturbing the regular schedule at the best.
- The students are boosted to organize the events class wise and finally the best organizing team will be awarded to encourage them to take part in organizing committee and get holistic development opportunities.

5) Evidence of Success:

Most of the students show an improvement at the exit level as compared to the entry level. The college provides equity, inclusiveness. Today the students take part not only in curricular activities but also participate in other events like Cultural and Sports and as a result have bagged several prizes at various events conducted inter- college as well as in University Level.

6) Challenges encountered and resources required:

Time constraint is the major problem to conduct the various activities due to semester system. Knowledge is Power is the motto of the institution. Steady efforts are made to conduct all the activities to empower the students in an holistic manner. As majority of the students come from mother tongue medium of language in lower classes, which throws a tough challenge for the teachers in making the students shift to English medium and take part in several competitions. Hence they are provided to take part in mother tongue language.

Majority of the students in the Institution hail from rural areas situated in the outskirts of Chitradurga town because of which they face issues in travelling which effects their participation in various competitions. To encounter this, Teachers made themselves available to monitor the activities to be conducted within the time span provided as scheduled.

Economically our students are facing crises and are unable to adopt several properties to perform in an extra-ordinary level, even though they are talented, hence the Institution will be providing such support to take part in the University level.
