

The Institution is committed to providing advanced and up-to-date IT infrastructure to support the academic and research needs of its students and faculty. It regularly upgrades its technological facilities to ensure a modern and efficient learning environment. The campus is equipped with high-speed optical fiber broadband internet, offering reliable and seamless connectivity across all departments.

This robust internet infrastructure enables students to access online academic databases, digital libraries, and e-learning platforms with ease. It supports uninterrupted research activities, allowing users to download large data, stream educational content, and participate in online learning without technical disruptions. The availability of sufficient bandwidth ensures that multiple users can access the internet simultaneously without any compromise in speed or performance.

The institution's IT facilities also promote collaborative learning by facilitating real-time participation in virtual classrooms, webinars, and online discussions. These resources enhance both teaching and learning experiences, making them more interactive and accessible. The reliable connectivity further supports remote learning and academic flexibility.

By continuously upgrading its IT infrastructure, the institution demonstrates its commitment to innovation and academic excellence. The efficient and modern technological environment not only improves the quality of education but also equips students with the necessary digital skills to succeed in a competitive and technology-driven world.

## Student Computer Ratio

Total No. of Students	Total No. of Computer for Students	Ratio
548	19	1:1

Our institution demonstrates exceptional resource management by ensuring that our students of **548** receives high-quality technical training through a specialized laboratory framework. While the facility houses **19 high-performance computers**, we guarantee a **1:1 student-to-computer ratio** by employing a rigorous, batch-wise allocation system. Every student is assigned to a specific group based on the master timetable, ensuring that no more than 19 students are present in the lab at any given time. This disciplined scheduling allows each individual to have exclusive access to a workstation, fostering an environment where hands-on learning is prioritized and personal focus is maintained. By dividing the total enrollment into these precise, manageable batches, the college successfully bridges the gap between our large number of students and our dedicated computing infrastructure. This systematic approach ensures that every student, benefits from equal and uninterrupted time for practical exercises, project work, and digital research. Our commitment to this 1:1 allocation policy, underpinned by a strict adherence to the academic calendar, reflects the college's mission to provide equitable and effective technical education for all 548 students.
